

Evidence Based for Healthy Diet for Nutrition Breastmilk

Introduction

Breast milk plays a vital role in the healthy growth and development of infants. The Research Institute for Future Food (RiFood) of The Hong Kong Polytechnic University (PolyU) has conducted a study to analyse the three-day dietary records and breast milk samples of Hong Kong lactating women.

Aims

- To share the results of the research team suggested lactating women should enhance the levels of carotenoids and polyphenols in breast milk through increasing their fruit and vegetable intake.
- To understand phytonutrients such as carotenoids and polyphenols are important in the physical development of infants and can reduce the level of inflammation.

Speaker

Prof. LO Ka Hei, Kenneth

Assistant Professor, Department of Food Science and Nutrition, PolyU

19 May 2026 (Tuesday) | 18:30 – 20:30
D1, 13/F, Hyde Centre, 223 Gloucester Road, Wan Chai
