

Certificate on Maternal and Infant Nutrition and Nurture: Bio-cultural Perspectives

Commence in February 2022

Aim

- To advance knowledge and skills to enable critical engagement with complex issues of maternal, fetal and infant nutrition and nurture within diverse cultural and societal frameworks

Learning Outcomes

On successful completion of this module a student should be able to:

- Critically analyse the nutritional requirements of mothers and/or their infants and the impact of the developing mother-infant relationship
- Critically discuss the current knowledge regarding how optimal and suboptimal nutrition and nurture influence maternal, neonatal and family health outcomes
- Debate global, national and local policies and recommendations with regard to the Protection, Promotion and Support of Breastfeeding and achieving optimal infant and young child feeding (IYCF)
- Critically analyse the political, economic and socio-cultural influences on maternal and/or infant nutrition, nurture and early parenting behaviours
- Critically evaluate the effectiveness of strategies for improving maternal and/or infant nutrition and nurture at the micro, meso and macro level
